## RA2 Shutters

## RA4 & RA77 Shutters

## RA4 & RA9 Shutters & Roller Grilles

### SMART, RELIABLE & SECURE

The effective protection of high value stock within premises is essential. The quality of today's interiors is complemented by the DGS range of shutters and roller grilles. Subtly sculpted slat profiles, excellent finishes, vision when required and an all round quality appearance ensure security is provided sympathetically.

To be effective security must, of course, be used - each system is designed to operate quickly and easily either manually or at the touch of a button.

There are products suited to differing environments and security levels, all however, are designed to be very compact. Tight coiling of the shutters means housings are small and do not require large headroom for the shutter box, with wide spans possible within the range, wider if intermediate fixed or removable guide rails are employed.

RA2, heat and sound insulation, light easy operation. Shown vented

RA4, tough, secure, yet sympathetic to interior design.

### RA2

Lightweight and compact, the RA2 is a cfc free foam filled aluminium slat, offering good strength, insulation and sound deadening.

- CFC Free foam filled rolled aluminium curtain profile
- Low to medium security applications
- Spans widths up to 3400mm
- Effective heat and sound insulation
- Also used for shading and light control
- Lightweight therefore ideal for manual operation
- Vented slat option

### RA4

Manufactured from exceptionally strong extruded aluminium

- Strong extruded aluminium curtain profile
- Medium security applications
- Spans widths up to 4000mm
- Can be powder coated in special colours if required
- Can be mixed with RA4 where partial vision is required
- Very compact shutter box
- Available for use with high security guide rails

### RA4 VISION

Attractive punched slat design is a stylish compliment to contemporary interiors.

- Strong extruded aluminium profile
- Delivers up to 45% Vision
- Polycarbonate glazing option
- Medium security applications
- Spans widths up to 3000mm
- Available as in-line pattern only
- Can be powder coated special colours if required
- Can be mixed with RA4 when partial vision is required
- Available as in-line pattern (No brickbond option)
- Very compact shutter box

### AUTOMATION

All electrically operated shutters are:

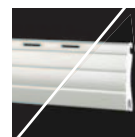

RA4 & RA77 - perfect for internal or external kiosks  
- RA77 shown here.

RA9, high vision levels with very compact coiling.

RA4 Vision, very light in use with good strength and vision.

### IN DETAIL

#### RA2

40mm deep double wall foam filled rolled aluminium slat. Suitable for external or internal installation. Spring and lock operated shutters are supplied non-vented as standard, all other operations are supplied vented as standard but are also available non-vented.

#### RA4

38mm deep profiled double wall extruded aluminium slat. Suitable for external or internal installation.

#### RA4 VISION

38mm deep profiled single wall extruded aluminium slat. Punched or perforated. Clear polycarbonate insert option available. Suitable for external or internal installation.

#### RA77

77mm deep profiled double wall foam filled extruded aluminium slat. Suited to external or internal installation.

#### RA9

Built on shutters with 100mm deep extruded aluminium bars and links. In-line and brickbond option patterns. Suitable for internal installation only.

### RA77

A strong, insulated high performance rolled aluminium profile.

- CFC Free foam filled rolled aluminium profile
- Medium security for commercial, industrial and retail premises
- Spans widths up to 5400mm with effective heat and sound insulation
- Can be mixed with RA8 when partial vision is required
- The curtain material is available in up to eight stock colours

### RA9

The new generation of roller grille - very tight coiling and a number of alternative link patterns gives outstanding light transmission

- Strong extruded aluminium roller grille
- Delivers up to 69% vision
- Very compact coil diameter
- Medium security applications
- Spans up to 5000mm
- Can be powder coated special colours if required
- 150mm or optional 75mm vertical link spacing
- Corporate logos can also be included
- Solid slats can be added to further enhance security
