

FS20R - Fixed Child Safety Barrier

Fitted internally prevents children under 5 falling out of low windows.

The Problem

- We protect our children in the home or nursery in very many ways using stairgates, safety harnesses and cot sides. Until now though, open windows and small children were an accident waiting to happen

The Solution

- An adjustable barrier with fixing arms on each corner that slot into brackets fitted into angled side fixing bars.
- Top corners are fitted with child resistant keyless camlocks, with both locks having to be released in order for the barrier to be removed.

SECURITY INDICATOR = NA

Product Benefits

- Prevents children falling out of windows
- Vertical infill bars prevent children climbing
- Can be quickly removed in an emergency using a keyless lock
- Complies with Part K2 of the Building Regulations

Comes Complete With

- 1 – 800mm High Adjustable Steel Barrier
- 2 - Vertical angled side fixing bars
- 2 - integral keyless

Applications

- Low Height Windows
- Nurseries, Play Areas
